*Long* before the first frost arrives, outdoor entertaining takes a back seat and we head indoors. Some of the best times with family and friends are held around the dinner table. Good food, company and conversation makes for special memories. A time to suspend our busy lives, relax and enjoy.

Decorating for entertaining need not be stressful. Shop your home for everyday objects that can be re-purposed for your table. Be imaginative with themes, texture and colour choices.

The Fall table pictured is a twist on the regular hues of the season. An unexpected colour palette of pewter, white and silver can be adapted for almost any occasion. Our starting point came from the linen closet with a pewter coverlet featuring a circular design. An everyday white dinner plate, topped with a patterned salad plate continues the theme. A silver maple leaf adds a simple Fall element to the placesetting with sprayed Chinese Lanterns from the garden adding a layer of texture. A dimension of height was achieved using a pewter vase from the living room filled with silver coloured ferns. Other items from around the home complete the setting.
